Financial Information and Corporate Governance

CONTENTS

The consolidated financial statements for the year ended December 31, 2013 as presented in this annual report were prepared under the responsibility of the Board of Directors and authorized for issue on April 1, 2014 subject to approval of the statutory non-consolidated accounts by the shareholders at the Ordinary General Meeting to be held on May 28, 2014.

Consolidated income statement

(1) Attributable to equity holders of the parent company
(2) The decrease of the translation reserves for an amount of 480 thousand € is mainly explained by the decline of the rand and the pound sterling against the euro.

Summary of principal accounting policies

The principal accounting policies adopted when preparing these consolidated financial statements are set out below.

1. Declarations of conformity

The consolidated financial statements at 31 December 2013 have been prepared in accordance with the International Financial Reporting Standards (IFRS), as adopted in the European Union. The Zetes Group has not anticipated any standards or interpretations issued prior to the approval date of the financial statements, and which come into application later than 31 December 2013.

2. Summary of changes in accounting principles

The new standards and interpretations listed below are mandatory for the first time for the annual financial periods beginning on or after the date mentioned next to the standard or interpretation.

a. Standards and interpretations applicable from 2013

IFRS 7	Financial Instruments: Disclosures - Amendment regarding the offsetting of assets and liabilities
IFRS 13	Fair value measurement
Amendments to IAS 1	Presentation of Financial Statements - Other comprehensive income
Amendments to IAS 19	Employee Benefits
Amendments to IAS 12	Income Taxes - Deferred Tax: Recovery of Underlying Assets
Amendments to IFRS 1	Government Loans First-time Adoption of IFRS: Severe Hyperinflation and Removal of Fixed Dates for First-time Adopters
IFRIC 20	Stripping Costs Incurred during the operational phase of an open pit mine (1/1/2013)

b. Standards and interpretations already published by not yet in force as of 31 December 2013

IFRS 9	Financial Instruments and subsequent amendments (effective date not yet communicated).
IFRS 10	Consolidated Financial Statements (1/1/2014).
IFRS 11	Partnerships (1/1/2014).
IFRS 12	Disclosure of shareholdings in other entities (1/1/2014).
Amendments to IAS 19	Employee Benefits: Employee Contributions (1/7/2014, but not yet endorsed in the EU).
Amendments to IAS 27	Separate Financial Statements (1/1/2014).
Amendments to IAS 28	Investments in associates and joint ventures (1/1/2014).
Amendments to IAS 32	Financial Instruments: Presentation – Offsetting Financial Assets and Financial Liabilities (1/1/2014).
Amendments to IFRS 10, IFRS 12 and IAS 27	Consolidated Financial Statements and Disclosure of Interests in Other Entities: Investment Entities (1/1/2014)
Amendments to IAS 36	Recoverable amount Disclosures for Non-Financial Assets (1/1/2014, but not yet endorsed in the EU).
Amendments to IAS 39	Novation of Derivatives and Continuation of Hedge Accounting (1/1/2014, but not yet endorsed in the EU).
IFRIC 21	Levies charged by Public Authorities (1/1/2014, but not yet endorsed the in EU).

The other aforementioned standards, interpretations and amendments will, to the knowledge of management, have no significant impact on the consolidated financial statements (limited impact on the disclosures to be made).

3. Preparation

The financial statements are prepared on a historical cost basis, except for the measurement at fair value of available-for-sale investments and derivative financial instruments. The consolidated financial statements are presented in euro, which is the company's functional currency.

The preparation of these financial statements requires the use of estimates and assumptions in determining the value of assets and liabilities at the balance sheet date and income and expenses for the year. The Zetes Group revises its estimates at each closing date based on the best available information. The key estimates involve assessing:

- assets and liabilities in business combinations
- the recoverable amount of goodwill and the intangible assets (development costs)
- the results of construction contracts
- provisions, including for litigation
- capitalized tax loss carry-forwards
- where appropriate, the forecast evolution in results

4. Basis of consolidation

a. Subsidiaries

Subsidiaries are those entities controlled by the Company. Control exists when the Company has an interest of more than one half of the voting rights of an enterprise or otherwise has the power, directly or indirectly, to govern the financial and operating policies of an enterprise so as to obtain benefits from its activities. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences (or a date nearby) until the date that control ceases. The acquisition of subsidiaries (business combination) is recorded in accordance with IFRS 3 revised, with identifiable assets acquired and liabilities assumed recorded at the time of takeover of control at fair value. Business combinations made before 1 January 2010 were accounted for under IFRS 3 (as applicable prior to revision) and have not been restated.

Intra-group balances and transactions, and unrealised gains arising from intra-group transactions, are eliminated in preparing the consolidated financial statements.

b. Joint ventures

Joint ventures are those entities over whose activities Zetes has joint control together with a third party, established by contractual agreement. For reasons of consistency over time (cf. IFRS 11 – Partnerships – above), this entity, which is integrated into Metaform Ltd, is proportionately consolidated.

5. Foreign currency translation

Transactions in foreign currencies are translated at an average rate that approximates the foreign exchange rate ruling at the time the transaction took place. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated to euro at the foreign exchange rate prevailing at that date. All foreign exchange gains and losses arising on this translation and from the settlement of the transactions are recognised in the income statement. Non-monetary assets and liabilities denominated in foreign currencies, which are stated at historical cost, are translated to euro at the foreign exchange rate prevailing at the date of the transaction.

Upon consolidation, the assets and liabilities of subsidiaries stated in foreign currencies are translated to euro at foreign exchange rates prevailing at the reporting date. Goodwill and fair value adjustments related to the acquisition of foreign subsidiaries are translated at the historical rate at the date of acquisition and therefore no exchange differences arise. Income and expenses are translated to euro at the average rate for the period. Foreign exchange differences arising on translation are recognised directly in equity. When a foreign entity is sold, such exchange differences are recognised in the income statement as part of the gain or loss on sale.

The main exchange rates used are:

	Closing 2013	Closing 2012	Average 2013	Average 2012
1 Euro =				
Pound sterling	**0.8337**	0.8161	**0.8491**	0.8108
Swiss franc	**1.2276**	1.2072	**1.2309**	1.2053
US dollar	**1.3791**	1.3194	**1.3282**	1.2856
Rand	**14.5660**	11.1727	**12.7768**	10.5362

6. Revenue recognition

The Company does not specifically break out the sales of goods from the provision of services. In various cases, solutions are sold at an overall sales price with no distinction made between income from the provision of services and that from the sale of goods. The level of gross margin is the assessment criterion used by the Company as reflecting the value added by the Group.

Revenue is recognised to the extent that it is probable that the economic benefits will flow to Zetes and the revenue can be measured reliably. Additionally, the following criteria must be met:

a. Sale of products

Revenue from the sale of hardware products is recognised in the income statement when the significant risks and rewards of ownership have been transferred to the buyer.

Income from the sale of standard software is recognised at the time of physical delivery to the customer, to the extent that such sale is definitive. As a general rule, ownership of the software remains with the publisher, which grants only user rights to its customer.

b. Maintenance contracts

Revenue from maintenance contracts is recognised on a straight-line basis over the term of the service contract.

c. Integration services

Revenue from integration services, such as project management and installation of equipment, is recognised in the income statement according to the percentage of completion method. The degree of completion is measured by reference to the proportion of service costs incurred to date as a percentage of the estimated total service costs for each project.

d. Projects

Each project is broken down into its elementary components: hardware, software and services. Income is then recognised according to the rules which apply to each component. Where the individual components of a project cannot be broken out (sale of a total project), a global state of progress is determined and income from the project is determined as a function of this.

e. Construction contracts

A construction contract is a contract specifically negotiated for the construction of an asset or a combination of assets that are closely interrelated or interdependent in terms of their design, technology and functions or their ultimate purpose or use. In the Zetes People

Authentication business, a construction contract typically involves the design and development of a card production pilot as well as the card production roll-out accompanied by project management and other value-added personalisation services.

When the outcome of a construction contract can be estimated reliably, contract revenue and contract costs are recognised using the percentage of completion method. The stage of completion is measured by reference to the number of cards produced in proportion of the total to be produced for each project. Contract cost includes all expenditure directly related to specific projects and an allocation of fixed and variable overheads incurred in connection with contract activities.

The aggregate of the contract costs incurred that relate to contract activity already performed, plus/minus the profit/loss recognised on each contract, is compared against the progress billings to date. Where costs plus/minus profit/loss exceed progress billings, the net balance is shown under trade and other receivables. Where progress billings exceed costs plus/less profit/loss, the net balance is shown under trade and other payables. Advance billings that relate to work to be performed in the future, are not considered in the above calculation and are included in advances received.

When it is appears probable that total contract costs will exceed total contract revenue, the expected loss is recognised in the income statement immediately. When the outcome of a construction contract cannot be estimated reliably, contract revenue is recognised to the extent of contract costs incurred where it is probable that those costs will be recovered.

f. Royalties, interest and dividends

Revenue from royalties is recognised on an accrual basis in accordance with the substance of the relevant agreements. Interest income is recognised on a time proportion basis, taking account of the principal outstanding and the effective rate over the period to maturity, when it is determined that such income will accrue to Zetes. Income from dividends receivable is recognised when the right to receive payment is established.

7. Government grants

A government grant is recognised when there is reasonable assurance that the grant will be received and all attaching conditions will be complied with.

Grants related to assets (such as for capital expenditure) are credited to deferred income and released to the income statement on a straight-line basis over the expected useful life of the relevant asset.

Grants relating to income are recognised in the income statement over the period necessary to match them with the costs they are intended to compensate.

8. Property, plant and equipment

Property, plant and equipment are stated at cost less accumulated depreciation and any accumulated impairment losses.

Land is not depreciated while owned buildings are depreciated over 20 years on a straight-line basis. Buildings are revalued by an outside valuer every three years, with recognition of any significant changes. Leasehold improvements are depreciated over the shorter of estimated useful life and lease term. Other items are depreciated on a straight-line basis over the estimated useful lives as follows:

Buildings structural works	20 years
Building equipment and installations	Maximum 10 years
Plant installations, machinery and equipment	3 - 5 years , or by the actual number of items produced vs. the total number of items expected to be produced on the machine
Goods ID equipment for commercial use (demo stock)	2 – 4 years
Computer and office equipment	3 – 5 years
Furniture	5 – 10 years
Vehicles	4 years

9. Intangible assets

a. Research & development

Zetes does not perform any fundamental research activities. Development expenditure is recognised as an intangible asset, only when (among other criteria) it can be demonstrated that the product resulting from the development is likely to generate economic benefits and when the expenditure incurred on the development can be measured reliably. Capitalised development expenditure is measured at cost less accumulated amortisation and any accumulated impairment losses. Amortisation is charged on a straight-line basis over the estimated useful life of the related asset, which is expected to be 3 years.

b. Other intangible assets

Expenditure to acquire computer software and other licenses are stated at cost less accumulated amortisation and any accumulated impairment losses. Amortisation is charged on a straight-line basis over the estimated useful life, not exceeding 5 years.

c. Goodwill

Goodwill arising on acquisition of subsidiaries and joint ventures represents the excess of the cost of the acquisition over Zetes' share in the net fair value of the identifiable assets liabilities and contingent liabilities recognised. Goodwill is recognised as an asset and is initially measured at cost. Subsequently its carrying value may be reduced by accumulated impairment losses (application of an impairment test).

10. Current assets and liabilities

a. Inventories

Inventories are stated at the lower of cost and net realisable value. In respect of raw materials and consumables, cost is accounted for according to the weighted average price. The cost of goods purchased for re-sale is the individual purchase price of each individual item or the weighted average price. Work in progress and finished goods are valued at manufacturing cost, which includes all direct production costs.

b. Inventory write-down

The amount of write-down is estimated by an analysis of stock rotation (sales/product), with a distinction made between finished goods and repair parts/equipment.

When inventories are sold, the carrying amount of those inventories is recognised as an expense in the period in which the related revenue is recognised.

The amount of any reversal of inventory write-downs owing to an increase in the net realisable value is accounted for as a reduction in the amount of inventory charged to the period in which the reversal takes place.

c. Trade receivables

Trade receivables are recognised and carried at original invoice amount (nominal value). Allowances are recognised when collection of the full amount is no longer probable.

d. Trade payables

Trade payables are stated at their nominal value.

11. Cash and cash equivalents

Cash and cash equivalents are carried at nominal value in the balance sheet. They comprise cash at bank and in hand, as well as short-term deposits with banks and commercial paper with a term of three months or less, that are readily convertible to cash and that are not subject to significant risks of changes in value.

12. Leases

a. Financial leases

Leases, in which Zetes obtains the right to use assets, are classified as finance leases if substantially all the risks and rewards incident to ownership of the leased item are transferred to Zetes. Finance leases are capitalised at the fair value of the leased item at the inception of the lease or, if lower, at the present value of the minimum lease payments. Lease payments are apportioned between the finance charges and the reduction of the lease debt as to achieve a constant rate of interest on the remaining balance of the debt. Finance charges are charged directly against the income statement.

Depreciation

Assets held under financial leases are depreciated on a straight-line basis over the useful life of the asset. If there is no reasonable certainty that Zetes will be the owner of an asset at the end of a lease, the asset is 100% depreciated over the shorter of the length of the lease or the useful life of the asset.

b. Operating leases

Leases that do not meet the criteria of finance leases are classified as operating leases. Payments made under operating leases are charged to the income statement on a straight-line basis over the lease term.

13.Income taxes

Income tax expense is recognised in the income statement.

a. Current tax

Current tax is the estimated tax payable on the taxable income for the year, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

b. Deferred tax

Deferred tax is provided using the balance sheet method in respect of temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Deferred tax liabilities are recognised for all taxable temporary differences, except where the deferred tax liability arises from goodwill amortisation.

Deferred tax assets are recognised for all deductible temporary differences, unused tax losses and unused tax credits, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, unused tax losses and unused tax credits can be utilised (selected horizon: 5 years).

In respect of tax losses acquired upon investments in subsidiaries and joint ventures, deferred tax assets are recognised only to the extent that it is probable that the taxable profit against which the tax loss can be utilised will be generated within five years after the acquisition.

The carrying amount of deferred income tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilised. Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

14. Equity – capital increase

The transaction costs linked to any capital increases are accounted for as a deduction from equity, net of any related income tax benefit.

15. Dividends payable

Dividends declared after the balance sheet date are not recognised as a liability at the reporting date but are directly deducted from equity when paid.

16. Provisions

A provision is recognised when (i) Zetes has a present obligation (legal or constructive) as a result of a past event, (ii) it is probable that an outflow of resources will be required to settle the obligation, and (iii) a reliable estimate of the amount can be made. Where Zetes expects an amount for which a provision has been charged to be reimbursed, for example under an insurance contract, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

Commitments resulting from restructurings are recognised when announced to the persons concerned.

17. Pension benefit plans and other post-employment benefits

Zetes operates various post employment benefit plans in accordance with the local conditions and practices of the countries in which it operates.

Costs relating to defined contribution pension plans are recognised when due. There are currently no pension plans of the defined benefit type in place at Zetes.

Certain subsidiaries provide a post-employment benefit that is not a pension plan. The benefits are unfunded and represent a legal obligation consisting of defined payments when employees leave the Company. The related provision is determined separately for each employee (present value of the estimated future cash outflows).

18. Derivative financial instruments

Derivative financial instruments utilised by Zetes are principally forward exchange contracts and currency options for hedging purposes. Any changes in fair value are taken directly to equity.

No derivative instrument is held or has been issued for trading purposes.

19. Borrowing costs

Borrowing costs, including interest on borrowings and bank overdrafts, as well as ancillary costs incurred in connection with the arrangement of borrowings, are recognised as an expense in the period in which they are incurred.

(*) Limited or no operations

2013 Events

Early in 2013, Zetes purchased 15% of the shares of Zetes Industries (Israel) Ltd.

In May 2013, Zetes established a new subsidiary in Senegal (Zetes Senegal).

The subsidiary Zetes Gambia Ltd (Gambia) is being formed at the end of 2013; its impact on the 2013 consolidated financial statements is not significant and it has therefore not been included.

The company Anvos GmbH (Germany) merged with Zetes GmbH in Germany.

Joint ventures

In 2009, Zetes created a joint venture with the company Pitkit Printing Enterprises. For time consistency reasons, this entity, integrated into Metaform Ltd, is proportionately consolidated.

Segment information

Zetes Industries applies IFRS 8 'Operating Segments'. The group is organized into two activity clusters - Goods ID and People ID - that operate in different ways and with a distinct management and organisational structure.

The Goods ID division is highly decentralized, with local operations working more autonomously and responding to its customers' needs for proximity. The division has introduced an international structure, with physical locations across Europe, Israel and South Africa (15 countries).

In contrast, the People ID division is highly centralized, though the concluding of a number of 'build and operate' contracts has led Zetes to set up secure document production units in various countries. Zetes also has business development teams operating on the African continent (South Africa, Cote d'Ivoire).

Internal reporting is limited to the specific analysis of sales, gross margin, operating expenses, EBITDA and depreciation/amortization for each cluster. Zetes also has a 'corporate' structure, the expenses of which are monitored separately.

Earnings results, investments, assets and liabilities for each segment include items directly attributable to a segment as well as items that can reasonably be allocated to it. Segment assets include fixed assets, goodwill, inventories, trade receivables, construction contracts, advance payments and taxes receivable. Segment liabilities include trade payables, advance payments received, and debts to employees and government bodies.

Non-allocated sales/results relate to central administration (corporate).

1. GOODS ID

Goods ID	2010	2011	2012	2013	%
In '000 €					
Sales	155 290	170 703	171 518	171 187	-0.2%
Gross margin	63 047	68 518	69 323	68 334	-1.4%
Operating expenses	-51 652	-58 636	-61 884	-59 226	-4.3%
Current EBITDA	11 395	9 882	7 439	9 108	22.4%
% Sales	7.30%	5.80%	4.34%	5.32%	
EBITDA	11 002	9 258	6 285	8 415	33.9%
Current EBIT	7 054	5 225	2 296	3 201	39.4%

In 2013, the Goods ID Division significantly improved its performance; while sales and gross margin were very similar to those of the previous year, current EBITDA increased by 22.4%, the result of good cost control (-4.3%).

The year ended much better than it started: after a slowing of order-taking at the start of the year, a more positive trend followed from summer onwards, with the conclusion of several major projects. The impact of this turnaround is clearly reflected in current EBITDA, which nearly doubled between the first and second half (€ 3.1 million vs. € 6.0 million).

The retail sector remains an important customer because it is constantly seeking to increase productivity through better traceability along the supply chain. Zetes' solutions (ZetesMedea and ZetesChronos in particular) provide an answer to the problem and can deliver a rapid return on investment.

Pressure of competition between manufacturers continues to compress margins on mobile terminals and other equipments. The sale of services (life cycle management) and software (in the form of services and, increasingly, licences) allows Zetes to offset this pressure and maintain its margins. Good cost control together with productivity gains enabled Zetes to improve its performance, even in the absence of revenue growth.

In this way the EBITDA/sales ratio increased by 1% from 4.3% in 2012 to 5.3% in 2013.

At the same time, the Division continued to invest in its 6 key solutions, which correspond to its particular areas of expertise and initial commercial successes validate Zetes' strategic choices. The MCL mobility platform has been well received. It gives customers much improved management of their mobile terminals and the first references have now been installed in the retail non-food and transport sectors. Already, sales of the 6 key solutions have helped offset the effects of constant pressure on hardware prices and margins seen in the 2013 financial results. Zetes expects this effect to be more clearly visible in the 2014 results. Advance indicators, such as sales cycle tracking, clearly show an increased level of interest in these solutions from customers.

Internal growth and currency effects

Besides its impact on the business in the countries concerned, changes in exchange rates, particularly between the South African Rand and the Euro, were unfavourable to the Goods ID division.

Goods ID *Currency effect excluded*	2012	2013	%
In '000 €			
Sales	171 518	174 699	1.9%
Gross margin	69 323	69 768	0.6%
% Sales	*40.4%*	*39.9%*	
Operating expenses	(61 884)	(60 631)	-2.0%
Current EBITDA	7 439	9 137	22.8%
% Sales	4.3%	5.2%	
EBITDA	6 285	8 421	34.0%

Performance analysis on a constant scope basis (i.e. organic growth only) shows that, at constant exchange rates, sales would have increased by 1.9% and gross margin by 0.6%.

The priority for the year was the development of the 6 key solutions, with external growth put on temporary hold. Only one (asset) deal was completed in 2013, which involved taking over a team of 10 specialists in e-commerce-related logistics along with the intellectual property and customers of the company, L4 Epsilon, in France (€ 0.2 million). This acquisition has been fully integrated into Zetes France. The data provided below also reflects the fact that Zetes in the Czech Republic was only partially consolidated in 2012.

Goods ID *Pro forma 2013*	**2012**	**2013**	**%**
In '000 €			
Sales	171 518	169 470	-1.2%
Gross margin	69 323	67 795	-2.2%
% Sales	*40.4%*	*40.0%*	
Operating expenses	(61 884)	(58 920)	-4.8%
Current EBITDA	7 439	8 875	19.3%
% Sales	4.3%	5.2%	
EBITDA	6 285	8 182	30.2%

2. PEOPLE ID

2013 was marked by a significant number of new long-term contracts, including the Belgian and Gambian passports and biometric visas in Senegal. With the exception of Senegal, where the system is in place and has been generating income since July 2013, the other contracts have initially absorbed substantial resources for development and preparation, with revenue to come during the course of 2014.

In 2013, Zetes did not execute any major 'Build and Transfer' project with a high hardware component. Such contracts are usually associated with the preparation of electoral cycles, for which the electoral roll is prepared based on a biometric enrolment of the population. In this case, the contract and its execution follow in quick succession. Only two 'Build and Transfer' projects were completed in 2013, for Togo and Guinea Conakry. Both consisted primarily of services, generating a limited income but high margins.

People ID	**2010**	**2011**	**2012**	**2013**	**%**
In '000 €					
Sales	61 448	49 859	42 608	40 285	-5.5%
Gross margin	25 663	26 959	24 377	23 112	-5.2%
Operating expenses	-14 885	-14 904	-14 490	-15 433	6.5%
Current EBITDA	10 779	12 055	9 887	7 679	-22.3%
% Sales	17.50%	24.20%	23.20%	19.1%	
EBITDA	10 764	11 693	9 879	7 552	-23.6%
Current EBIT	7 865	9 131	7 641	6 159	-19.4%

In 2013, 80% of revenue came from 'Build and Operate' contracts, with a gross margin of 57.4%, reflecting the division's value-added strategy.

In many cases, these long-term contracts are awarded by governments that entrust Zetes with responsibility for looking after their population databases and issuing related identity or travel documents. The scope of these projects varies, with electronic ID card systems in Belgium, Israel and Portugal, as well as the Belgian driver's licence. For several years now, Zetes has also managed, on behalf of Côte d'Ivoire, the comprehensive biographical and biometric registration of its citizens and the issue (personalization) of their electronic passports.

In 2013, the Gambian government awarded Zetes the concession for a similar passport system in Gambia ('Build and Operate' model). And in August 2013, the Belgian government entrusted Zetes with issuing passports for Belgian citizens. The past months have been used to prepare these contracts. The issuance of documents will begin in the second quarter of 2014 for both contracts.

In addition, starting in July 2013, the division internalized the secure distribution of identity documents to Belgian municipalities. Until then, these were distributed by an outside carrier whose external costs were reflected in purchases. This decision resulted in an increase in gross margin in the second half (decreased purchases) and a corresponding increase in operating expenses.

With current EBITDA down 22.3% compared with 2012 at € 7.7 million, the current EBITDA to sales ratio remains high at 19.1%. This percentage can be explained by the very high 'services' component in the 'Build and Transfer' contract sales and the fact that 'Build and Operate' contracts are capital intensive. Invoicing therefore includes an amount to cover depreciation of the investments. Current EBIT amounts to € 6.2 million (-19.4%).

This trend is, however, temporary and elsewhere, 2013 has been marked by a large intake of long-term contracts. These are at the development stage and will support good revenue growth in 2014.

3. GROUP

The cost of the Corporate Division amounted to € 3.3 million. The Zetes model is based on strong operational divisions and a light corporate structure. The main tasks of Zetes Corporate are strategy definition, financial control and external growth.

NOTE 4. NON-CURRENT COSTS AND INCOME / FINANCIAL RESULT

NON CURRENT COSTS AND INCOME	2011	2012	2013
In '000 €			
Restructuring costs	(893)	(1 280)	(693)

Comments on Goodwill

The goodwill increase of k€ 46 is related to the asset deal involving L4 Epsilon in France.

Earnouts

The earnouts adjustments made in 2013 have been booked in the P&L (application of IFRS 3R).

Breakdown of the goodwill by segment

The goodwill is allocated according to the segment where the acquisitions have been made: Goods ID or People ID.

Zetes Group organizes its activity by businesses, each under the authority of a specific manager. It is at this level that strategy, resource allocation, solutions and priority markets are determined. It is also at this level that performance is analysed.

	2011	2012	2013	VAR.
In '000 €				
By segment				
Goods ID	36 816	36 569	36 615	46
People ID	3 309	3 309	3 309	-
Total goodwill	**40 125**	**39 878**	**39 924**	**46**

For each entity, the Group identifies whether it is a "mono-activity" or not. A "mono-activity" is considered to be a separate CGU. Those that are not mono-activity are organised in such a way as to be able to break down analytically their activities, including the assets and liabilities attached thereto.

Each analytical unit then constitutes a CGU. CGUs are then grouped into groups of CGUs that make up the Goods ID and People ID divisions.

The goodwill is allocated to these groups of CGUs.

Assets constituting a cash-generating unit are tested for impairment before undertaking an impairment test at the level of the group of CGUs to which the goodwill is allocated.

The Group examines the value of the goodwill shown in the statement of financial position at each annual closing date, or more often whether indications of impairment exists.

The external impairment index used is the market capitalization of the company. The recoverable amount of a cash-generating unit is determined on the basis of fair value, less costs of sales or, where insufficient in respect of goodwill, of value in use. The fair value is calculated based on valuations effective in the industry, namely a multiple of EBITDA adjusted for net cash position.

The cost of sales is estimated at 5% of the value of the entity under review. The value in use is calculated based on projected cash flows derived from the annual budgets as adopted by the Board of Directors, as well as assumptions concerning the evolution of the business over a five-year period.

Cash flows beyond the range of the projections are extrapolated using estimated average growth rates, as indicated below.

Estimated cash flows do not include incoming and outgoing cash flows from financing activities or related to income taxes.

Past flows are compared to estimated projections.

The assumptions used in the tests are the same for all CGUs. The weighted average cost of capital before taxes applied by the Group to all CGUs is compared with different sources and is updated periodically, but not whenever an impairment test is carried out. Between each update, the Group verifies that the key variables used in determining the WACC (applied in its activity segment) have not changed significantly.

Key assumptions used in calculating value in use

	2013
Discount rate	10%
Growth rate [1]	1%
Illiquidity discount	15%

(1) After the five-year period

Sensitivity analysis

The Group conducts a sensitivity analysis, with an emphasis on the key assumptions; these are the EBITDA multiplier used to determine the fair value and the growth forecasts used to determine the value in used (elaboration of different scenarios).

The analysis done in 2013 shows that the carrying value of the Goods ID division exceeds its fair value, without exceeding its value in use.

It also shows that the value in use of the division is significantly greater than its carrying value in the different scenarios.

NOTE 12. EQUITY NOTE

MOVEMENTS IN NUMBER OF SHARES	Ordinary shares
Number of shares on 31/12/2012	5 389 714
Number of shares issued in 2013	0
Number of shares on 31/12/2013	5 389 714

OWN SHARES	Number	In '000 €
Own shares, opening balance	215 769	3 253
2013 movements	18 553	250
Own shares, closing balance	**234 322**	**3 502**

In 2013, the Board of Directors decided to buy own shares, in accordance with the authorization given by the Shareholders' General Meeting.

Other informations

All issued shares are fully paid.
The articles of association authorise the Board of Directors to increase the issued capital for an amount of maximum 51.7 million €.
All shares are without par-value.

Dividend

The Board of Directors will propose to the Ordinary General Assembly held on May 28, 2014 to pay a gross ordinary dividend of 0.55 € per share.
This amount remains unchanged compared to the amount paid in 2013.
The proposed dividend has not been recognised as a liability at the end of 2013.

EARNINGS PER SHARE CALCULATION	Continuing operations	Total

Net profit (basic)

The net profit per share is calculated by dividing the net result of the Group by the weighted average number of ordinary shares outstanding during the year.

Net profit of the Group (in '000 €)	3 385	3 385
Weighted average number of ordinary shares outstanding	5 156 750	5 156 750
Basic earnings per share (in €)	**0.66**	**0.66**

Net profit (diluted)

For the calculation of the diluted earnings per share, the weighted average number of ordinary shares is adjusted to take into account the conversion of all dilutive equity instruments. At the end of 2013, the outstanding number of options is 184.669. The weighted average listing price is 16.18 € (2013) ; because it does not exceed the exercise prices, the options are not taken into account to compute the dilution effect.

Net profit of the Group (in '000 €)	3 385	3 385
Weighted average number of ordinary shares outstanding	5 156 750	5 156 750
Adjustments for options	0	0
Weighted average number of ordinary shares for diluted earnings per share	5 156 750	5 156 750
Diluted earnings per share (in €)	**0.66**	**0.66**

CONTINGENT LIABILITIES

On 31/12/2013, the Group has contingent liabilities with uncertainty on timing and/or amount, arising in the course of the business.

The contingent liabilities relate to possible obligations in respect of certain warranties given to bankers, customers, suppliers and joint ventures. The possibility of an outflow of resources embodying economic benefits is remote.

DEFINED CONTRIBUTION PLANS

Zetes operates various post employment benefit plans in accordance with the local conditions and practices of the countries in which it operates. Those plans are contracted with external insurance companies, which have to respect minimum legal returns. The contributions to these insurance schemes are funded by payments from employees and the relevant group's companies. The payments to defined contribution plans charged as an expense in 2013 amount to 1 465 thousand €.

2013 & POST CLOSING TRANSACTIONS

Zetes acquired in 2013 the assets of the company L4 Epsilon which is fully integrated into Zetes France.

The net assets & liabilities of this acquisition amount to 104 thousand €. Their book value before the business combination is the same.

There are no post closing transactions in 2014.

NOTE 17. AUDITOR'S MISSIONS

The auditor RSM Réviseurs d'Entreprises, represented by M. Laurent Van der Linden and M. Thierry Dupont, has been appointed by the 2011 Shareholders Meeting. It will expire at the 2014 Shareholders Meeting held to approve the 2013 accounts.

The mission and powers of the auditor are those granted by the law.

The Auditor may not be revoked by the Shareholders' Meeting other than for good reason.

Management of risks and uncertainties

Introduction

Risk taking is inherent in any business enterprise. There is no growth or value creation in a company without taking risks. If not properly managed and controlled, these risks may affect the Company's ability to achieve its objectives. By continuing to foresee and manage risks, risk management and internal control systems play a key role in conducting and monitoring various business activities.

Risk is the possibility of an event occurring that will have consequences that may affect the company's employees, assets, environment, objectives or reputation.

Risk management is the responsibility of all players in the company. It aims to be comprehensive and cover all activities, processes and assets of the company.

Risk management is a dynamic system of the company, which it defines and implements under its responsibility.

Risk management comprises a set of tools, behaviours, procedures and actions adapted to the characteristics of each company, that allows senior management to keep the risks to an acceptable level.

Risk management helps to:

a) Create and preserve the value, assets and reputation of the company

a) Place the company's decision making and processes on a firmer basis and help it achieve its objectives

a) Promote coherence between a company's values and actions

a) Mobilize company employees around a common vision of the principal risks and sensitize them to the risks inherent in their business.

Description of the risks

The Board of Directors presents below its assessment of the risks to which the company is exposed:

By the nature of its commercial activities, the company is exposed to the uncertainties attached to the development of the economy and to the situation of its customers and its competitors. Each of the risks listed below can have a negative impact on the overall condition of the company and its results. For this reason any forward-looking statements must be analysed in the light of this presentation. Besides the risks mentioned here, there may be other risks the company is not aware of, or which are not reported as such, but which could also have an adverse effect on the company.

Litigation risks

Zetes is, has already been, and could again be involved in legal action which is part of the normal course of business. Such legal action can relate to :

- warranty / product quality / installation issues
- conflicts with employees
- conflicts with the selling shareholders in the context of business combinations
- claims by Zetes against suppliers
- third party claims for patent infringement

The above list is not exhaustive. Where necessary, provisions are set up for such risks. Although these are estimated based on the company's best understanding of the situation, court judgements could expose the company to unexpected costs.

Risks related to human resources

Zetes seeks to be at the sharp edge of technology. Finding the human resources with which to remain there is a major challenge. Zetes' good name and its commercial and operational successes significantly reduce this risk.

Environmental risks

Zetes strictly respects all laws and regulations governing the protection of the environment. Even so, certain exceptional circumstances or accidents could potentially expose the company to litigation. The group is not involved in any environmental dispute at the present time.

Risks related to exceptional events

By its very nature the company is open to such risks. A fire or flood could always affect a production site, and with it the company's financial situation. Although Zetes insures against risks, there is no such thing as "zero" risk. More generally, there are natural and political risks that could destabilize the economic system, and hence Zetes' activity.

Risks attached to acquisitions

Zetes' strategy involves acquiring other companies. Despite the care with which management goes about these acquisitions and, in particular, the due diligence audits that are made, specific risks always exist. The most serious are linked to the process of integrating newly acquired companies into the group, to their activities before joining Zetes, to their real growth potential (over-estimation) and to the value of the technological know-how acquired. In certain cases, these risks could engender a loss of goodwill value.

Risks attached to new products

Zetes specialises in identification. To maintain its competitive advantage, Zetes carries out specific development and places specialized software and hardware on the market. In 2013 the company invested € 2.8 million. A total of € 4.9 million of development expenses are capitalised on the balance sheet. The risks associated with these developments are:

- over-ambitious sales objectives, insufficient profitability, owing to unsuitable functionalities, or the existence of less expensive competing products

- the placing on the market of products that are not yet stabilized, bringing a loss of credibility and/or additional, unanticipated expenses to resolve the problem
- the use of external components of insufficient quality.

Technological risk

For Zetes, technological risk is linked to the time at which a new technology is adopted. This risk is managed by a specific team, which acts as a technology watch units. This team concentrates expertise and knowledge as long as the technology is not yet ready for market. It also helps disseminate know-how and competencies once a decision to go to market has been taken by Group management.

Risk of fraud

The risk of fraud is inherent in all human activity. The company is attentive to appoint people of trust to key positions. This trust is considered the cornerstone of the fight against fraud. The company seeks, where the size of the subsidiary permits, to establish a separation of duties. Thus, persons in charge of procurement will not be responsible for paying bills. Limits on signing authority are also set according to the activity level of the companies concerned. Finally, the group executive committee is careful to limit the representative powers of the executive committees of the subsidiaries to day-to-day operations. It is also careful to ensure an appropriate division of powers within their management structures. To this end, direct communication channels exist with the group executive committee, both for local financial managers, who report both to their Country Managers and CFO, and for country managers, who are responsible for their performance to both the Group CEO and the Group CFO.

Price risk

This risk is covered by agreements with our main suppliers; price reviews are built into our contracts with them.

Credit risk

This risk is covered by a credit insurance company (around 50% of sales). Otherwise, an internal analysis of the credit risk is carried out, which reduces the counterparty risk. The multiplicity of clients, both geographical and sectoral, and their general quality also significantly reduce the Group's credit risk.

Liquidity and treasury risk

Zetes' liquidity and treasury risk is limited. In addition to a cash position of € 10.6 million (December, 2013), the company retains a significant borrowing potential based on an agreement signed with its three main bankers to finance projects, additional working capital needs or, partially, acquisitions.

Foreign exchange risk

The consolidated accounts are in euros. This means that the accounts of those group entities whose reference currency is not the euro need to be converted into euros on consolidation. To the extent that currencies fluctuate against one another this can negatively impact the accounts. The greatest risks are those of the fluctuation of the euro against the pound sterling, the Swiss franc, the rand and the shekel. At the operating level, and insofar as the charges of these entities are incurred in their own reference currencies, the currency risk lies essentially in their contribution to Group results. A risk also exists on loans/borrowings (repayment or revaluation). A potential risk also exists in the parity between the CFA and the euro.

In terms of buying, procurement is essentially in euros. There does exist, however, a US dollar risk for certain specific equipment that is purchased in this currency. Significant sales / purchase contracts in foreign currencies are normally hedged specifically. Zetes' financial department has a preference for forward foreign exchange contracts and, to a lesser extent, currency options, for hedging foreign exchange risk.

In People ID, some of Zetes' competitors use other currencies than the euro as their reference currency. Currency fluctuations may either strengthen Zetes' competitive advantage or weaken it against those competitors whose revenues (and costs) are collected (and incurred) in other monetary areas

Interest rate risk

The interest rate risk is limited to the extent that the company has a slightly negative treasury position. A rise in either short or long term rates would not significantly affect results. On top of this, bank debt serves mainly to fund short term working capital needs of subsidiaries. The occasional longer term debts for financing acquisitions or investments have a short average term which does not call for specific interest rate coverage.

ZETES INDUSTRIES SA

STATUTORY AUDITOR'S REPORT TO THE SHAREHOLDERS MEETING ON THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED DECEMBER 31, 2013

As required by law, we report to you on the statutory audit mandate which you have entrusted to us. This report includes our opinion on the consolidated balance sheet as at December 31, 2013, the consolidated income statement, the consolidated statement of comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, as well as the explanatory notes, together with our report on other legal and regulatory requirement.

Report on the consolidated financial statements – Unqualified opinion

We have audited the consolidated financial statements for the year ended December 31, 2013, prepared in accordance with International Financial Reporting Standards as adopted by the European Union. The consolidated statement of financial position shows total assets of 163 187 (thousand) EUR and the consolidated income statement shows a consolidated profit of 3 397 (thousand) EUR.

Responsibility of the board of directors for the preparation of the consolidated financial statements

The board of directors is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards as adopted by the European Union, and for such internal control as the board of directors determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Statutory auditor's responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the statutory auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the group's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the group's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the board of directors, as well as evaluating the overall presentation of the consolidated financial statements.

We have obtained from the company's officials and the board of directors the explanations and information necessary for performing our audit.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Unqualified opinion

In our opinion, the consolidated financial statements give a true and fair view of the group's net equity and financial position as of December 31, 2013, and of its results and its cash flows for the year then ended, in accordance with International Financial Reporting Standards as adopted by the European Union.

Report on other legal and regulatory requirement

The board of directors is responsible for the preparation and the content of the directors' report on the consolidated financial statements.

In the framework of our mandate, our responsibility is to verify, for all significant aspects, the compliance with some legal and regulatory requirements. On this basis, we provide the following additional comment which does not modify the scope of our audit opinion on the consolidated financial statements:

- The directors' report on the consolidated financial statements includes the information required by law, is, for all significant aspects, in agreement with the consolidated financial statements and is not in obvious contradiction with any information obtained in the context of our mandate.

Statement on Corporate Governance

1. The 2009 Belgian Code on Corporate Governance

This section is based on the rules and the principles which organize the corporate governance of Zetes Industries SA/NV (the Company). These are listed exhaustively in the Company's Corporate Governance Charter as approved by the Board of Directors of the Company and available, along with the Company's coordinated articles of association, on the Zetes Industries SA/NV website (http://www.zetes.com/en/investor-relations/corporate-governance).

The Company's Board of Directors intends to comply with the 2009 Belgian Code on Corporate Governance, but believes that certain deviations from its provisions are justified in view of the Company's particular situation.

Principle 2.9. Secretary of the Company

Given the size of the Company, the Board of Directors does not plan to appoint a Company secretary.

Principle 5.3. Appointments committee

None of the principles relating to the Appointments committee are applicable.

Principle 5.2./17 Internal audit

The company does not have an independent internal audit function. Taking into account the nature, size and complexity of the company, executive management has established rules and procedures and has divided up responsibilities between different people in order to ensure the proper functioning of its internal control and risk management system.

2. BOARD OF DIRECTORS

2.1. Composition, appointment and termination of the Board of Directors

In accordance with article 15 of the articles of association, the Company is managed by a six members minimum Board of Directors consisting of legal or physical persons, who do not have to be shareholders.

Pursuant to the articles of association, the Directors are appointed by the General Meeting of Shareholders for a term of maximum 6 years and are re-eligible. Their terms of office expire at the end of the Ordinary General Meeting following the last year of their term.

As of 31 December 2013, the Board of Directors of Zetes Industries SA/NV consisted of 10 persons. The Ordinary General Meeting of 27 May 2015 will decide on the appointment of all directors for their next term.

Name and position	Term until(**)	Professional Address
Alain Wirtz SA **Represented by Mr Alain Wirtz** **Chief Executive Officer (CEO)** (Nominated by Zephir Corporation) (Executive Director)	2015	Rue de Strasbourg 3 1130 Brussels

GEMA SPRL **Represented by Mr Michel Allé** (Independent Director)	2015	Place Constantin Meunier 17 1190 Brussels

** Mr Paul Jacques and Mr Jean-François Jacques are unrelated.*

(**) The term of office of directors ends immediately after the Annual General Meeting of shareholders held in the year mentioned next to the director's name.

The statutory auditor of the Company is RSM Réviseursd'Entreprises - Bedrijfsrevisoren, having its registered office at Chaussée de Waterloo 1151, 1180 Uccle, represented by Mr Laurent Van der Linden and Mr Thierry Dupont. This firm has audited the Company's consolidated accounts since 2000, while introducing a rotation of its representatives. Mr Laurent Van der Linden and Mr Thierry Dupont are responsible for auditing the Company's statutory (unconsolidated) and consolidated accounts. The three-year mandate of the statutory auditor will expire at the General Shareholders' meeting that will be held on 28 May 2014.

2.2. Role of the Board of Directors

The Board of Directors is the decision-making body of Zetes Industries SA/NV, (i) with the exception of matters reserved to the shareholders by law or on the basis of the articles of association, and (ii) with the exception of the management powers delegated to the Managing Directors.

The Board of Director's role is to pursue the long-term success of Zetes Industries SA/NV and the Zetes Group by providing entrepreneurial leadership and enabling risks to be assessed and managed. The Board of Directors decides on Zetes Industries SA/NV's values and strategy, its risk appetite and key policies. The Board of Directors ensures that the necessary financial and human resources are in place for Zetes Industries SA/NV to meet its objectives.

2.3. Responsibilities of the Board of Directors

The key responsibilities of the Board of Directors include:

- Reviewing, evaluating and approving, on a regular basis, long range plans and strategy for Zetes Industries SA/NV and the Zetes Group;
- Reviewing periodically Zetes Industries SA/NV's corporate objectives and policies;
- Monitoring and evaluating the performance of Zetes Industries SA/NV and the Zetes Group against strategic goals, plans and budgets;
- Reviewing, evaluating and approving the overall corporate organisational structure;
- Reviewing, evaluating and approving major resource allocations and capital investments (including acquisitions and divestments);
- Reviewing the financial and operating results;
- Reviewing, evaluating and approving budgets and forecasts;
- Taking all necessary measures to ensure the correctness and the timely publication of financial reports and other significant financial and non-financial information;
- Supervising the performance of the external auditor;
- Appointing the Managing Directors;
- Deciding on the Executive Committee structure;
- Reviewing Executive Committee performance;
- Maintaining continuing interaction and dialogue and a climate of respect, trust and candour with the Executive Committee;
- Reviewing, evaluating and approving the remuneration policy as it relates to the Executive Committee of Zetes Industries SA/NV;
- Monitoring and reviewing the effectiveness of the Board committees.

2.4. Organisation of the Board of Directors

2.4.1. Board Meetings

Regular Board meetings are held, at least approximately six times a year, with special meetings convened as necessary by the Chairman of the Board of Directors or two Directors.

Board meetings may also be organised by means of video- or teleconference. Each meeting is chaired by the Chairman of the Board of Directors and, in his absence, by the CEO or by an executive Director. The Board of Directors can only validly deliberate and decide if at least half of its members are present or represented. Resolutions are taken by a simple majority of the votes cast.

In 2013, the Board of Directors met 6 times. The attendance of individual directors was as follows: all members attended all meetings except for Mr José-Charles Zurstrassen (19 February 2013), ALAIN WIRTZ SA, represented by Mr Alain Wirtz (29 March 2013), JEAN-FRANCOIS JACQUES SPRL, represented by Mr Jean-François Jacques (28 August 2013) and Mr Olivier Gernay (29 Mars and 28 August 2013).

2.4.2. Agenda Items for Board Meetings

The Chairman of the Board of Directors establishes the agenda for each Board meeting. At the beginning of the year the Chairman of the Board of Directors establishes a schedule of the main topics to be discussed during the year. A detailed agenda and, to the extent feasible, supporting documents and proposed resolutions are provided to the Directors five calendar days prior to each Board meeting. The agenda lists the topics to be discussed and specifies whether they are for information, for deliberation or for decision-making purposes. Directors review these materials in advance of the meeting. Each Director is free to suggest the inclusion of items on the agenda. Subject to any applicable notice requirements, Directors who have suggestions for topics to be included in the agenda are required to advise the Chairman of the Board of Directors well in advance of such meetings.

2.4.3. Assessment

Under the leadership of its Chairman, the Board of Directors will conduct regular self-assessments to determine whether it and its committees are functioning effectively. The evaluation will have the following objectives:

- Evaluating how well the Board operates;
- Checking that important issues are adequately discussed and prepared;
- Evaluating the content of each Director's contributions, his or her presence at Board and Committee meetings and the constructive nature of his or her involvement in discussions and decisions;
- Checking the actual composition of the Board against the desired composition; with the non-executive Directors regularly evaluating their interaction with the Executive Committee.

At regular intervals the way each director has exercised his or her duties, as well as his or her role and responsibilities, will be reviewed with a view to adapting the composition of the Board to reflect intervening changes. Specific attention will be given to the evaluation of the Chairman of the Board of Directors and the Chairmen of the Committees. When a director's term of office comes up for renewal, that director's involvement and effectiveness will be evaluated using a transparent and pre-established procedure. The Chairman of the Board will receive comments from all Directors and will report to the Board of Directors. This report will include an assessment of the Board's performance. The evaluation will focus on the Board's contribution to the company Zetes Industries SA/NV, and specifically on those areas in which the Board considers that there is room for improvement.

The Board will react to the results of performance analysis by recognizing its strengths and correcting weaknesses. When required, this will involve the appointment of new members, the non-reappointment of existing members or the taking of any action that seems appropriate for the effective functioning of the Board of Directors.

The Board will ensure that measures are taken for the orderly reappointment of Board members. It will ensure that any new appointment and any renewal, of both executive and non-executive Directors, will maintain an appropriate balance of required skills within the Board of Directors.

3. Internal control and risk management as regards the preparation of financial information

Internal control relevant to the preparation of financial reporting is a structural component of the company, defined and implemented under its responsibility, which seeks to ensure the reliability of financial information and the compliance of the financial statements with IFRS (International Financial Reporting Standards).

The Board of Directors is responsible for defining the measures necessary to ensure the integrity and timely publication of the financial statements and of other significant financial information provided to shareholders.

The executive committee is responsible for establishing and monitoring internal controls based on the reference framework approved by the Board of Directors as well as for preparing the financial statements and other significant financial information of the company.

Internal control of financial information includes more specifically rules and procedures that:

- relate to the detailed recording of transactions involving company assets;
- provide reasonable assurance that transactions are recorded in such a way as to permit preparation of financial statements in conformity with IFRS;
- provide reasonable assurance that the company's sales are made in accordance with the conditions imposed by the Executive Committee and Board of Directors of the company, and that the expenditures of the company are incurred with their authorization;
- provide reasonable assurance regarding the prevention or timely detection of any unauthorized acquisition, use, or transfer of assets that could have a material effect on the consolidated financial statements.

The Executive Committee is responsible for the exercise of internal control over financial reporting. This control includes the evaluation of significant risks, identifying malfunctioning, shortcomings and difficulties of implementation, and monitoring of measures taken to correct deficiencies identified.

Given its limitations, internal control of financial information may be unable to prevent or detect false declarations. In addition, it is difficult to anticipate how effective such control will be in future periods: controls could potentially become inadequate because of changing conditions or because they fail to keep pace with evolving policies or procedures.

The Executive Committee has evaluated the effectiveness of the internal control of financial reporting as of 31 December 2013. This evaluation focused on the design of the internal control of financial information and included tests of its operating efficiency.

On this basis, the Executive Committee was of the opinion that, as of 31 December 2013, the Company had adequate internal control of financial information.

4. Managing Directors and Executive Committee

The Board of Directors has appointed the managing directors of Zetes Industries SA/NV. The Board of Directors has granted authority to the managing directors to enable them to fulfil their responsibilities and duties. They will have sufficient room to propose and implement, within the legal framework, a corporate strategy that reflects the company's values, risk appetite and key policies. To this end, the Chief Executive Officer (CEO) (Alain Wirtz SA) and the Chairman of the Board (Jean-François Jacques SPRL) are both managing directors of Zetes Industries SA/nv. The managing directors work together with the Executive Committee, which consists of all the executive directors of Zetes Industries SA, i.e. currently the two managing directors and the CFO. The Executive Committee is therefore composed of three members: the two managing directors, Alain Wirtz SA and Jean-François Jacques SPRL, and the CFO of the company, Mr Pierre Lambert. The Executive Committee does not constitute a management committee (comité de direction) within the meaning of article 524bis of the Belgian Companies Code.

5. Committees of the Board of Directors

5.1 Role

A substantial portion of the preparatory analysis and work of the Board of Directors is done by standing Board Committees. The decision-making, however, remains within the collegial responsibility of the Board of Directors, with the Committees only having an advisory function (but not excluding the possibility of ad hoc delegations). They assist the Board of Directors in specific areas, which they cover in appropriate detail and upon which they make recommendations to the Board of Directors. The Board of Directors will have at all times an Audit Committee and a Remuneration Committee. The Board of Directors may, from time to time, establish or maintain additional Committees as necessary or appropriate.

5.2 Composition and appointment

Committee members shall be appointed by the Board of Directors. The Chairman of the Board of Directors shall ensure that the Board of Directors appoints Committee members and a Chairman for each of these Committees. Each Committee is composed of at least three members. Appointment shall not be for a term exceeding that of Board membership. In deciding on the specific composition of a Committee, consideration shall be given to the needs and qualifications required for the optimal functioning of that Committee. The designation of Committee members is based on (i) their specific competences and experience, in addition to the general competence requirements for Board members, and (ii) the requirement that each Committee, as a group, possesses the competences and experience needed to perform its tasks.

5.3 Audit Committee

The Audit Committee assists the Board of Directors in its oversight of (i) the integrity of the Company's financial statements, (ii) the Company's compliance with legal and regulatory requirements, (iii) the external auditor's qualifications and independence, and (iv) the performance of the Company' internal controls and risk management and its external auditors' accomplishment of their mission.

The responsibilities of the Audit Committee are described in detail in the Corporate Governance Charter.

The Audit Committee is composed exclusively of non-executive Directors. At least one of them is an independent director. At 31 December 2013, the members of the Audit Committee were:

- Gema SPRL, represented by Mr Michel Allé (Chairman of the Audit Committee, independent director)
- Mr Hiram Claus (non-executive director),
- Floris Vansina BVBA, represented by Mr Floris Vansina (non-executive director)
- Mr Paul Jacques (independent director)

5.4 Remuneration Committee

The role of the Remuneration Committee is to assist the Board of Directors in all matters relating to the remuneration of Board members (executive and non-executive) and of those Zetes Industries SA/NV employees that report directly to the Executive Committee, and in those matters regarding the governance of the group on which the Board of Directors or the Chairman of the Board of Directors wishes to receive the Committee's advice.

The responsibilities of the Remuneration Committee are described in detail in the Corporate Governance Charter.

The Remuneration Committee should consist of no less than three Directors. All members should be non-executive Directors. The majority of Committee members should be Independent Directors. At 31 December 2013, the members of the Remuneration Committee were:

- Jean-Marie Laurent-Josi (Chairman of the Remuneration Committee, non-executive director)
- Paul Jacques (independent director)
- José-Charles Zurstrassen (independent director)

6. Report on the remuneration of Directors and the Executive Committee

ZETES INDUSTRIES SA/NV - Remuneration Report 2013

6.1 General Principles of the Remuneration Policy

This section describes the general principles of Zetes Industries' remuneration policy.

The aim of the remuneration policy within the Zetes Group is to reward individual and collective performance, to align the interests of the senior managers, directors and shareholders of Zetes Industries, while taking due account of the differences between the Group's operating companies. This policy has been applied consistently for many years.

With respect for good corporate governance, compensation is consistent with the standards for the industry, and a bonus system, directed at the performance and the values of the Company, exists to motivate the Zetes Industries executive management and the managers of the Group to work towards the lasting growth of the value of the Company.

The remuneration guidelines and the bonus systems of the Zetes Group seek to ensure the Executive Management of Zetes Industries and to Group executives of appropriate remuneration for their activities and their levels of responsibility, taking into account the economic situation and the success and the prospects of the Zetes Group.

In this way the total remuneration package of executive directors of Zetes Industries as well as heads of the operational and functional units consists is made up as follows:

1. fixed components independent of the results,
2. bonuses dependent on both the results for one financial year and the respect of quality criteria directly related to an alignment between the long-term strategy of the Company and the interests of its shareholders

These general principles already applied in 2012 and continued to do so in 2013.

6.2 With regard to the market conformity of remuneration

In order to assess objectively the remuneration of the Executive Management, the Remuneration Committee has ad hoc studies[*] enabling it to position said remuneration.

The surveys assess the amount and the structuring of compensation. This has allowed the Remuneration Committee to ensure that the remuneration of Executive Mangement is in line with that practised by publicly traded Belgian and European companies of similar structure, size and activity.

(*) a.o. "Executive remuneration in Belgium 2013", E&Y

6.3. Remuneration of the executive directors

This section describes the remuneration programme for executive directors. It contains a description of the structure of their remuneration and also clarifies the relationship between performance and pay levels.

6.3.1 Principles

The contractual arrangements and remuneration of members of the Executive Management are adopted and audited annually by the Remuneration Committee appointed by the Board. With respect to variable remuneration, the Remuneration Committee sets the objectives of the Executive Management and assesses how far these have been fulfilled.

6.3.2 Beneficiaries

The Executive Management of the Company is composed of the following companies and persons:

Alain Wirtz SA represented by Mr Alain Wirtz	CEO and Managing Director
Jean-François Jacques SPRL represented by Mr Jean-François Jacques	Chairman of the Board and Managing Director
Mr Pierre Lambert	Chief Financial Officer and Director

6.3.3 Remuneration structure

In 2013, members of the Executive Management received remuneration consisting of a fixed salary and variable compensation dependent on both Zetes Group's consolidated financial results and the respect of qualitative targets including a concept of long-term growth in the enterprise value.

The criteria taken into account in determining variable compensation are:

- The achievement of the budget objectives of the reference year as adopted by the Board at the end of the previous year;
- The reactivity and adaptability of Executive Management to economic changes during the reference year;
- The ability to propose external growth operations and to integrate them successfully into the Group.

Moreover, taking into consideration the constant readiness demonstrated by the Executive Management of Zetes Industries over the last twenty years to manage the business in a long-term perspective, the Compensation Committee intends to propose to the General Assembly that it waives, by specific approval, the prescriptions of Article 520ter of the Companies Act.

6.3.4 Summary of the total compensation paid in 2013

Remuneration of the CEO

	2013
Fixed remuneration	305 000 €
Variable remuneration	85 500 €
Total	**390 500 €**

Remuneration of the other members of the Executive Management

	2013
Fixed remuneration	451 000 €
Variable remuneration	125 400 €
Total	**576 400 €**

6.3.5 Stock Options and shares

For 2013 there was no remuneration in the form of Stock Options or shares either for the CEO or for the other members of Executive Management.

6.3.6 Pension plan

No pension plan is established for the companies Alain Wirtz SA and Jean-Francois Jacques SPRL.

Mr Pierre Lambert, in his capacity as Chief Financial Officer and director of Zetes Industries SA, works under the mandatory self-employed regime. He enjoys an individual pension commitment, the amount of which is included in his remuneration.

6.3.7 Severance indemnities

In the event of the revocation of their appointments, other than dismissal for serious offence, Alain Wirtz SA and Jean-François Jacques SPRL will each receive an indemnity equal to twelve months' compensation (annual base salary and variable pay); that of Mr Lambert, as a self-employed mandatary, will be equivalent to eighteen months.

In the event that Alain Wirtz SA and/or Jean-François Jacques SPRL resign from their directorships, they undertake to provide, at the request of the Board, various support, consultancy and transfer of know-how activities on an exclusive basis for a period of twelve months on the same financial terms (annual base salary and variable pay). Mr Lambert's undertaking is for nine months.

There is no provision for any special severance payment in case of takeover ('golden parachutes').

6.3.8 Right of recovery of variable remuneration

Other than as provided by law, there is no specific contractual provision concerning the recovery of the variable remuneration attributed on the basis of incorrect financial information.

6.4. Remuneration of non-executive directors and members of Board committees

The non-executive directors of the Company receive for their Services a) a fixed annual amount, decided by the General Meeting of Shareholders and set at € 6.000 and b) an amount of € 500 for each attendance at a Board of Directors meeting.

The non-executive members of the Audit Committee receive an amount of € 1.250 for each meeting of the Audit Committee in which they participate.

The Company does not provide non-executive directors with any remuneration, benefits or other incentives, other than remuneration, for their services as directors of the company. Non-executive directors do not receive any variable remuneration linked to results or other performance criteria. They are not entitled to stock options, or to any extra-legal pension scheme.

At 31 December 2013, the remuneration of non-executive directors broke down as follows:

	Board of Directors	Audit Committee	Total
Jean-Marie Laurent Josi (*)	9 000 €		9 000 €
Floris Vansina BVBA	9 000 €	5 000 €	14 000 €
Paul Jacques	9 000 €	5 000 €	14 000 €
José-Charles Zurstrassen	8 500 €		8 500 €
Olivier Gernay	8 000 €		8 000 €
Gema Sprl	9 000 €	5 000 €	14 000 €
Hiram Claus (*)	9 000 €	5 000 €	14 000 €
Total	61 500 €	20 000 €	81 500 €

(*) Messrs. Jean-Marie Laurent Josi and Hiram Claus surrender their directors' fees in favour of SA Cobepa.

7. Capital structure

The capital of the Company is represented by 5.389.714 shares. At 31 December 2013, Zetes Industries SA/NV held 234.322 own shares, leaving 5.155.392 shares in circulation at the same date. In 2005, the Board of Directors issued 191.894 warrants for the benefit of its employees, directors or persons having management assignments at Zetes Industries SA/ NV subsidiaries. Each warrant was granted free of charge and entitled its holder to one share, exercisable at € 23 per share. Under the conditions of the share option plans, these warrants became exercisable from June 2009. At 31 December 2013, 181.869 warrants remained in circulation.

In 2007, the Board of Directors also issued 23.800 warrants for the benefit of its employees, directors or persons having management assignments at Zetes Industries SA/NV subsidiaries. Each warrant was granted free of charge and entitled its holder to one share, exercisable at € 22.63 per share. At 31 December 2013, 2.800 warrants remained in circulation.

7.1. Shareholding structure

Based on the notifications received and published up till 31 December 2013, the shareholding structure is as follows:

Without exercise of the warrants

Shareholder	number of shares	%
Zephir (in concert with Cobepa)	1 277 495	23.70%
Cobepa (in concert with Zephir)	1 329 655	24.67%
Axa Belgium	199 453	3.70%
Other registered shareholders	8 641	0.16%
Public	2 340 148	43.42%
Own shares	234 322	4.35%
TOTAL	**5 389 714**	**100%**

After exercise of the warrants.

Shareholder	number of shares	%
Zephir (in concert with Cobepa)	1 277 495	22.92%
Cobepa (in concert with Zephir)	1 329 655	23.85%
Axa Belgium	199 453	3.58%
Other registered shareholders	8 641	0.16%
Employees	184 669	3.31%
Public	2 340 148	41.98%
Own shares	234 322	4.20%
TOTAL	**5 574 383**	**100%**

Except for the above mentioned information, as at 31 December 2013 the Company has not received any other notification of any ownership of shares of more than 3% in compliance with the articles of association.

7.2. Notification Art. 74 of the Law of 1 April 2007

According to article 74 of the Law of 1 April 2007 on takeover bids, Zetes Industries SA/NV has received notifications from the following shareholders. These notifications include all legally required statements and mention in particular that, acting in concert with other people since 21 November 2005, these shareholders held more than 30% of the voting securities issued by the company:

a) Zephir Corporation SA, a corporation organised under the laws of Belgium acting in concert with Copeba SA.

b) Copeba SA, a corporation organised under the laws of Belgium acting in concert with Zephir Corporation SA.

Under the terms of their agreement, Zephir Corporation and Cobepa have agreed (among other matters) the following:

a) Minimum number of directors - each party will vote in favour of a minimum number of candidates for directorships proposed by the other in accordance with the following rule: one candidate for every complete 7% of all the issued and outstanding shares of the Company held by Zephir Corporation or Cobepa.

b) Pre-emption right: the parties have a pre-emption right on the shares the other party wishes to transfer according to defined rules. However, 25% of the shareholdings owned by both parties immediately after the IPO are free of this pre-emption right.

7.3. Measures to prevent insider trading

The Zetes Group's code of conduct to prevent insider trading is included in the Corporate Governance Charter. This is published on the website (www.zetes.com/en/investor-relations/corporate-governance).

8. Policy for the appropriation of the results

The intention of the Company is to pay out dividends for an amount of about one third of its net profit before goodwill impairment. Any proposal to pay dividends will also be based upon the Company's financial situation, its capital requirements and other factors considered important by the Company.

In accordance with this policy, the Board of Directors will propose to the General Shareholders' Meeting on 28 May 2014 that it declare a gross ordinary dividend per share of € 0.55, equal to the previous year's amount.
